The Utah Center for Advanced Imaging Research (UCAIR) in the Department of Radiology and the Comprehensive Arrhythmia Research & Management (CARMA) Center in the Department of Cardiology at the University of Utah are seeking four enthusiastic graduate students with a strong background on biomedical engineering/science and interest in the field of cardiovascular MRI. Two students will work on research related to quantitative cardiovascular MRI and non-contrast angiography, and the other two students will work on research related to atrial fibrillation. The projects are interdisciplinary in nature, and the students will be able to work with basic scientists and clinicians. The positions are available immediately, and interested students should send CV and contact information to Dr. Daniel Kim (dankim1@gmail.com)
