The University of Utah Department of Bioengineering

Supervisory Committee Report on the Ph.D. Dissertation Proposal of

To pass the exam the student must demonstrate adequate preparation to begin a serious research effort; the student must be well versed in the fundamentals, have cogent familiarity with the primary literature in the proposed area of research and demonstrate the ability to design and communicate a scientific research plan. Students are given two opportunities to pass.

Committee Report on the Written Proposal
The advisor and supervisory committee have evaluated the written proposal and agree, by majority vote, on the following score:

_____ Pass  _____ Fail

_____ *Pass, contingent upon successfully modifying the written proposal to the satisfaction of the supervisory committee.

Committee Report on the Oral Proposal and Exam
The supervisory committee has witnessed the oral presentation, and subsequently examined the student in the absence of the advisor. The supervisory committee agrees, by majority vote, on the following score for the oral proposal and exam:

_____ Pass  _____ Fail (or tie vote)

_____ *Pass, contingent upon successfully responding to requests of the supervisory committee.
